The figure displays a multi-channel EEG recording. The top 14 channels represent various scalp electrode pairs: Fp1-F7, F7-T3, T3-T5, T5-O1, Fp1-F3, F3-C3, C3-P3, P3-O1, Fz-Cz, Cz-Pz, Fp2-F4, F4-C4, C4-P4, and P4-O2. The bottom two channels are labeled EKG and PHOTIC. The time axis at the top ranges from 08:08:32 to 08:08:41, with vertical dashed lines every second. A prominent red vertical line is positioned at approximately 08:08:36.5, indicating a specific event or time point of interest. The EEG traces show varying levels of activity, with a notable change in the pattern around the red line.

PHOTIC
